MLS of Elkhart County announces *Paragon reInsight Mobile & HiFi*

Paragon reInsight Mobile

Paragon reInsight Mobile is designed to give members the ability to search the MLS system for MLS listing information using a cell phone or PDA. The listing information can be displayed on your phone or emailed to your client.

Paragon reInsight Mobile is available now for members to access by going to <http://elkhart.mobile.fnismls.com> and entering the same User ID and Password used to log in to the MLS.

Paragon reInsight Mobile will give members access to a variety of robust searches including street name, city, schools, MLS #, price, and many more. Once the listing search is complete, members can view a detailed report displaying over 35 fields of data and multiple property photos.

Members will also be able to search for members and access their phone number and email address.

Paragon HiFi - VoiceSearch & Alert

Paragon HiFi includes VoiceSearch and VoiceAlert. VoiceSearch allows

members to search MLS listings from their cell phone. Members will call 1-888-446-3992. All you will need to know is the address or MLS # and VoiceSearch will verbally provide you with the basic information about the listing. Members will also have the option to have the information emailed or a text message sent to them, or ask to be directly connected to the listing agent.

VoiceAlert works hand in hand with the MLS's Prospecting system. Members can assign a VoiceAlert notification to any prospect that has an active listing search. When listing matches are found, VoiceAlert automatically phones the agent. Members have the option to hear brief details about these match properties.

For more information on these new products, go into the MLS system, MLS Docs, and click on Paragon HiFi for VoiceSearch & Alert or Paragon WiFi & Mobile for Paragon reInsight Mobile docs.
